CLEAN AND PREP SOLUTION

DESCRIPTION AND USE: Clean & Prep Solution is used to clean and degrease while simultaneously dissolving mineral deposits, increasing porosity for good adhesion on surfaces prior to painting.

LIMITATIONS: Do not apply to concrete that has already been sealed or stained.

SURFACE PREPARATION: After all surface repairs, power wash loose material off to a tight surface.

FOR BARE CONCRETE, GUNITE, MARCITE OR PLASTER: Mix 1 gallon Clean & Prep Solution with 2 gallons of water. Cleans approximately 400 square feet.

FOR PAINTED SURFACES OR BARE FIBERGLASS: Mix 1 gallon Clean & Prep Solution with 5 gallons of water. Cleans approximately 600-800 square feet. Use a garden sprayer for even application of product. Be sure the heavily soiled areas (such as the waterline, steps or regular footpaths on concrete decks) are scrubbed well. Triple-rinse the surface with a strong stream of clean water while scrubbing to ensure complete removal of all material.

FOR POOL FILTER ELEMENTS: Mix 1 gallon Clean & Prep Solution to 5 gallons of hot water; soak for at least 1 hour, rinse and repeat if necessary to completely remove scum and mineral deposits.

- #9306 CLEAN AND PREP SOLUTION
- 1 gallon **\$42.00**

- VOC Compliant
- Perfect for painted surfaces
- Turns traditional 3-steps into a 1-step process
- Water-rinse neutralize
- Odor-free; No Fumes
- Biodegradable, safe to use near plants & grass
- Excellent for filter element cleaning
